“Take charge of your inventory and reduce costs today!”

- Avoid running the risk of waste and money sitting on your shelves with too much stock
- Prevent production stoppage from stockout
- Optimise your cashflow

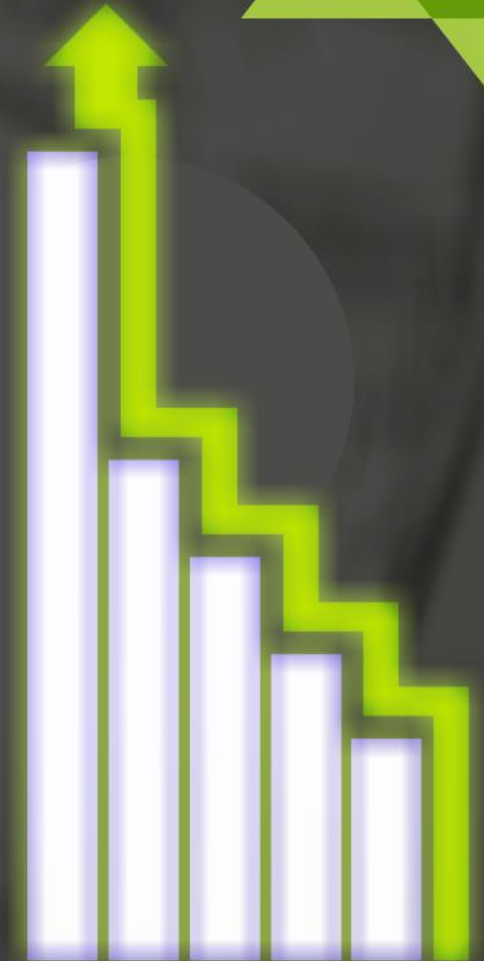

Safomar Industrial Brands offers an industrial stock management system through supplying and managing your entire procurement and management process. Our industrial stock management services are designed to meet your unique product and service requirements, delivering the best mix of products and technology to improve efficiency and reduce costs.

Meeting your individual business needs

Benefits for you:

- Reduction of procurement and stock costs
- Efficient and accurate inventory tracking for re-ordering
- Disposal of all waste materials in compliance with environmental regulations
- Periodic stock ageing, periodic stock consumption and pre-warning of obsolete stock within a prescribed period
- Live web based system with real time stock levels, online withdrawal of stock, real time warning of low stock levels and comprehensive audit trail of stock being consumed or issued

The capabilities include:

Procurement Management

Managing stock levels, negotiation of prices, factoring of lead times and efficient co-ordination of delivery and logistics.

Stock Level (Min / Max) Management

Facilitation of predicting future customer requirements by factoring historical demand, existing consumption and future production forecasts.

Storage

Storage of stock in our environmentally compliant main stores or offsite stores in accordance with regulations and quality assurance standards.

Waste Management

Collection and disposal of all waste materials in compliance with local environmental regulation.

Consignment Storage

Storage of stock as consignment in customers' facilities resulting with customers paying only for what they consume.

Reporting

Real time reporting on stock levels, ageing of stock, and identifying slow moving stock.

We are pioneers of this system in South Africa and are open to structure the management system to best accommodate your requirements.
